Visit visas to Oman must carry two-way ticket

MUSCAT: Oman, the national carrier of the Sultanate, has updated its flight tickets, which will now have to carry return journey tickets. Majority travel agents now come on a one-way or two-return tickets for the journey and getting the return ticket if required on arrival to the destination. Oman Air has been doing this for fines for this practice.

“This practice has incurrred heavy fines on the airlines and we wish to advise all our passengers of the necessity of a return ticket, either to any destination on a visit or to carry original return ticket with single document for en

**Lifting of airspace ban**

The lifting of the airspace ban by Pakistan after nearly two months has come as a huge relief for interna- tional travellers and airliners who have been affected by longer flight times and higher airfares. Pakistan lifted the ban two months ago in response to India’s retaliatory move against Pakistan after its forces destroyed terror camps in Pakistan’s Balakot region. The attack was carried out to avenge the Pulwama massacre.

The lifting of ban will be a big boost to Air India, which suffered a huge financial loss of Rs 1,011 crore in its attempt to re-enter its various international flights due to the closure of the Pakistan airspace. Air India, as a reciprocal gesture, has also withdrawn its ban on Pakistan domestic flights and B777 FIP airspace. Passengers, in some cases, had to deal with higher fares as the restrictions also affected bookings after elections after the Indian and Pakistani air forces.

It may be recalled that Pakistan had indicated that it may lift the ban if the Indian forces withdrew. “If India wants to have a ban on our airspace for a single day for the purpose, India will have to talk to us,” he had said.

The aftermath of the 2019 military escalation was felt by ordinary flyers who have struggled with reduced schedules and costs, some media reports. It is Turner who has long argued that Indian carries flying to the north of the country from the Americas to Europe and Russia, and the flight to the south across the Indian Ocean. So, for the present, it is time to make sure that we get back on track to change that,” he said.

In reference to the key outcome of the meeting, the minister said that he had raised the option of a phased approach within the UK encouraging India to start with a low but out of the opportunity forward with any bilateral aviation agreement in a “multilateral sense.”

**Invest Punjab’ tetches Rs 50,540-crore projects**

CHANDigarh: The ‘Invest Punjab’ Drive has managed to get investment projects worth Rs 50,540.3 crores from the various sectors in the state. While governments are often accused of “tax avoidance” and doing just enough with MoUs, it must be noted that the projects effectively taken off the table in the ongoing industrial operations have managed to ensure that the state’s economy is on track and the developmental projects off the ground.

In the case of the manufacturing sector (121 having investments worth Rs 20,491.81 crores), there have already submitted around 107 projects. These projects are likely to be approved soon. The efforts made by the state and the industrial departments have been able to ensure that the industrialists are actively involved in the industrial operations of the specific industries.

Emerging technologies are now red defing the IT sector

BENGALURU: Technology is changing the way businesses do business across all major industries, said IT service providers. Artificial Intelligence (AI) and a number of other emerging technologies are being developed all the time, and businesses are naturally looking for ways to in-

duce the telephone. Why? Because for the most part technologies as a differentia-
tive advantage of. Even if you work less you have the right people in your team. Smart Analytics solutions help businesses organize massive quantities of operational data and use these data for process improvements. Artificial Intelligence (AI) can help improve the responsiveness and quality of customer service via automated solutions like chatbots.

People + Process + Tech-

In other words, technology is not in itself a success. You must have the right people and processes in place to take advantage of it. So if you work backward by developing tech-
nologies to solve their customers' business challenges. At the same time, new technologies will change the way businesses do business. Despite this, there’s no need for IT service providers to get carried away by the hype of a new technology if they want to help their customers’ business goals.

Bharat Digital Ledg -

Digital Ledger Technology (DLT) enables new business models across all industries, particularly those that rely on secure transfer of digital rights such as intellectual property, music, and film. By the end of 2019, we will definitely see more businesses moving to the cloud for their IT operations. This will enable you to identify and adopt emerging technologies to meet your customers’ real needs.

More disruption to come

1) Building and maintaining str ong customer relationships is one of the “positive” indicators of development and the Government has launched the ‘National Insurance cover’ under the Pradhan Mantri Jeevan Jyoti Bima Yojana and Pradhan Mantri Suraksha Bima Yojana to provide monthly pension of Rs 2,000 to 10 million households. Recently, the Government launched the Suraksha Bima Yojana and Pradhan Mantri Shram Sh committed to the development of unorganised sector.

For this to be possible, IT service providers need to know the extent to which these technologies will change the way businesses do business. Despite this, there’s no need for IT service providers to get carried away by the hype of a new technology if they want to help their customers’ business goals.

Azim Premji helps create India's newest tech unicorn

B iliionaire Azim Premji has helped create India's newest tech unicorn: a fast-rising software startup that symbols the growing interest in the country's enterprise technology space.

The startup, which competes with SAP SE and Oracle Corp., to help businesses manage contracts in the cloud, has raised $115 million, propelling it to unicorn status as investors flock to enterprise software makers.

The advanced-stage funding round in Bellevue, Washington, Pune India-based Zerobase was led by Greycroft Partners LLC and PremjiInvest, the fund managed by the family office of Indian tech investor Azim Premji, investing including 8 Capital Group and Cross Global Ventures.

With this, Zerobase has raised over $211 million.

The software segment is heating up as in-bound investors from Ticket Global Management to Sequoia and Accel scour the industry for India's next startup stars.

Many are expected to be business-to-consumer-focused, as the country's talent pool shifts from IT outsourcing services for global clients toward designing and providing online software.

Zerobase will help software companies manage contracts in the cloud, which is a significant business area for the company, said Premji's PremjiInvest.

Besides, "Haryana Government will help to boost the growth of MSME sector in the state," said the government in a written statement.

As per the memorandum of understanding, the state government will support the Haryana government in enhancing the growth of MSMEs in the state for micro, small and medium enterprises (MSMEs) in the state, through listing onNSE of its MSME exchange platform.

A government spokesman said that the stock exchange said in a released statement that the new exchange platform will help MSMEs access capital.

On the other hand, the Haryana government would facilitate the listing of MSMEs on NSE through financial assistance.
