Indian-Americans receive IEEE McDowell Award

CALIFORNIA: Rajesh Gupta, a professor of computer science and engineering at the University of California San Diego, has been awarded the IEEE Jack R. McDowell Award by the IEEE Computer Society for his significant contributions in design and implementation of microprocessors, systems-on-chip and cyber-physical systems.

Gupta currently serves as founding director of the Halicioglu Data Science Institute at UC San Diego.

According to a university press release, Gupta has led several large scale projects to make advances in the fields of Variability and DASSA projects under Data Intensive Systems (DIS) and Circuit Radiation at Faster Timescales (CRAFT) programs.

Gupta has also led NSF projects MetroSilon and a co-PI on DARPA/ SRC Center on Com- puter Architecture and Network Infrastructure (CONIX) with the goal to provide a new generation of distributed cyber-physical systems with energy-efficient, city-scale sensing and actuation for improved services and autonomy of cities. His past contributions include Sys- tem modeling and PPARGII parallelizing high-level syn- thesis, both of which he presented at conferences and in industry applications.

Gupta received a bachelor’s degree in electrical engineering from IIT Kanpur, India, a master’s degree in science in EEE from Un- iversity of Condell on page 2

Indian refiners turn to OPEC to make up Iran oil gap

INDIA: Indian refiners are increasing their planned purchases, particularly from OPEC nations, Mexico and the US to make up for any loss of Iranian oil if the US enforces sanctions against Tehran. These developments come in the wake of rising oil prices and recent government announcements about plans to increase imports.

The state refiners have not placed any orders for Iranian crude oil for May, when the current waiver expires, a source close to the Iranian Oil Ministry said. The comment is in line with Iranian oil sales at a historic low, with some countries halting purchases.

A press conference at the Ministry of Finance in Riyadh gave details of the Financial Sector Conference to be held this month.

Most job seekers want to stay in UAE for at least five years

DUBAI: Nearly three quarters of job seekers in the UAE and Saudi Arabia would like to live and work in the Middle East for more than five years, according to a new recruitment consultancy report.

The Q1 2019 job market survey shows that 77% of respondents in the UAE and Saudi Arabia said they would like to stay in the Middle East for more than 15 years.

Al-Madina daily said that the report said that the top three reasons respondents cited for living and working in the Middle East were career prospects, pay and benefits and the opportunity to live and retire in the UAE or Saudi Arabia.

Mohandes cited Abani’s promise in 2003 about an “advisory board” that his company would “put the world in the palm of your hand.”

Indian financial system

The most important financial system in Asia is the Indian financial system. It is considered one of the most advanced in the world, with a strong presence in the global financial markets.

Indian financial institutions, such as banks, insurance companies, and stock exchanges, play a significant role in the Indian economy. They provide financial services to individuals, businesses, and governments, facilitating economic growth and development.

Indian financial institutions are subject to regulations and oversight by various government agencies and international organizations. These regulations ensure the stability and soundness of the financial system, protect consumers, and promote fair competition.

In recent years, the Indian financial system has undergone significant reforms and modernization, which has improved its efficiency and competitiveness.

NEW DELHI: Faced with a lacklustre response from bidders, the Central government is planning to overhaul the whole coal mining auction process.

"This resurgence also enabled Snapdeal to become the first e-commerce company in India to become cash flow positive, giving it the freedom to invest in its earnings in growing the business," Snapdeal said in a statement.

The company said it had hired nearly 150 new team members, mostly in the technology, engineering and sales verticals in 2018-19. Interestingly, more than half of the new hires in 2018-19 were former employees opting to rejoin across technology, supply chain, user growth, marketing and business verticals at Snapdeal.

"In the coming months, Snapdeal is looking to hire nearly 120 engineers who will work on various projects in the domains of machine learning, gamification, personalisation, cloud-agnostic production systems, etc." it added.

Air India keen on taking 5 grounded Jet Airways Boeings

NEW DELHI: Air India wants to take 5 widebody Boeing 777 aircraft of the now-grounded Jet Airways and use them as its lead lender State Bank of India (SBI).

The move is aimed at catering the peak demand on various international routes such as India-Gulf and India-Western Europe.

Jet Airways has 10 Boeing 777 in its fleet which it used to serve various prominent destinations in Europe and North America before halting the international operations.

"Air India has expressed its interest in taking 5 Boeing 777s on lease. The initial proposal there is," an industry source said.

While many domestic carriers have grabbed the opportunity created by the grounding of Jet, however, Air India has not jumped sharply with tickets on routes like Mumbai-London becoming prohibitively expensive.

Air India wants to capture the traffic on these routes by increasing its seat addition.

Last week, low-cost carrier Spajet had announced to induct 10 B737 into its fleet which were earlier operated by Jet Airways. The airline has planned to引进 another six aircraft and operate them on domestic routes as well.

The airline was then looking at adding vernacular components to improve the buying experience. "The technology team is helping Snapdeal to deepen its efficiency initia-
tives… improve the experience for asset owners and also lower the cost of operations. Technology continues, at the heart of Snapdeal 2.0’s success, in driving growth, superior experience and more efficient operations," it noted.

Snapdeal, which had seen its business being impacted severely by the intense competition in the e-commerce segment, had in 2017 dumped a USD 900-million-take over offer from rival Flipkart. It was then that Snapdeal co-founders, Kunal Bahl and Rohit Bansal had said Snapdeal will pursue a fresh strategy in the Indian market.

This strategy has helped Snapdeal narrow its consolidated losses in the third quarter of the fiscal, substantially to Rs 613 crore for 2017-18 from Rs 4,647.1 crore in 2016-17. Apart from trimming headcount, the company also sold its payment services unit (previously known as to Bank and Visa) to Kishore Biyani’s Future Supply Chain Solutions.

The company also introduced a Central Response hotline for asset owners and that over 640 of its asset owners can directly share their comments and expect resolutions.

"OYO in 2018, it said. The budget hotel chain has over 8,700 asset owner partners spread across nearly 260 cities in India and South Asia. But last month, Oyo and Homestay announced an investment commitment of Rs 1400 crore for the current fiscal in India and South Asia.

while reducing costs by 90 per cent.

"This resurgence also enabled Snapdeal to become the first e-commerce company in India to become cash flow positive, giving it the freedom to invest in its earnings in growing the business," Snapdeal said in a statement.

**Gulf FAQs: Wage protection**

I manage a Dubai company and after having issues with our previous business bank, I opened a new account with Emirates NBD. We met a number of their staff members for our specific needs and were offered several additional items but they were forwarded to the bank by October 28. We chased the bank for a number of items but were told to be patient for a date to be given for an appointment. On November 22, we pointed out that due to this delay the company is losing a lot of money and had been unable to comply with the requirements of the Wages Protection System because they were unable to move employees on their bank account. We continued to chase the bank and were told to be patient for the end of the holiday, and we had found someone else to tell us what was going on. We are getting desperate as our business can continue to operate properly. Can you help?

After reviewing this inquiry, I made contact with Emirates NBD last month and the bank promised to look into the matter strictly. You later notified me that the bank is taking advantage as I don’t know the law and I don’t know the rights that I have. Emirates NBD appreciates your customer feedback and will take every opportunity to follow up on any issue that may require any internal processes that require attention.

**Lifetime ban**

I was called to a meeting on April 10 and was reported to be abscenting. I then returned and as I was usually a regular, things were then deplored and given a lifetime ban. Can I come back to the country and work again?

The UAE is a very strict country where someone has been convicted of a crime, so this is usually a very serious thing that has been disclosed. This falls under Federal Law No. 8 for 1973 Concerning Incarceration and Releases and Amended Law No. 16. "An alien who has been deported may not re-enter the UAE without the permission of the Minister of Interior. You must also report to the Immigration to register the exit and entry of travellers to the UAE by the bank and to叙利亚 a similar office with its own website.

**Offshore account**

I have an offshore account in the Isle of Man and will be returning to the UK later this year. I will have to close this account and move the money to the UK at a later date and I am not sure what is going to happen. Is there any legal issue in maintaining an offshore bank account when you are an UK resident for tax purposes provided the appropriate declarations are made. You will need a copy of the laws of the jurisdiction they are operating in as that is being transferred. Unlike UK bank accounts, you do not have to pay tax on your annualised basic annual and basis partially deducted at source, depending on your tax bracket, offshore bank accounts are not subject to tax. It is of interest, meaning tax is not deductible. This means you can divide your income earned offshore to the UK this must be declared to Her Majesty’s Revenue and Customs and may be subject to income tax depending on your total income and marginal tax rate.

**Equal pay**

I work for a five-star hotel in the UAE and have finished my probation period. My manager let me know that my probation period by one month. I have found that this is against our agreement to give me this extension. I only found out my notice period had been extended after my agreed notice period had already expired. I have already taken advantage as I don’t know the law and how to proceed with this matter. What to do?

Your rights in the UK are not covered by UAE Labour Law and this applies to the hotel and its staff. Article 10 of the Labour Law stipulates that employees may be employed for a probation period not exceeding six months where the employer may terminate the services of the worker before the end of the probation period. The worker may not be employed by the same employer for a period of six months as a part of the service period. Therefore, if you have already been employed for six months, his probation period cannot exceed six months. If you were not a permanent employee under UAE Law if, however, the initial notice period was for more than one month, the period is extended to the agreement of both parties. As you signed a letter to this effect, this implies that the extension to the period extended the law has not been extended.

**Lump sum to maid**

I have employed a maid for several years and have paid her a lump sum to leave and she will be leaving the country to return to the Philippines. I want to make sure she is entitled to this amount as I believe the law has changed and now all helpers have to be paid. I have not heard about this. If a gratuity is payable, this does need to be backdated to the date of employment, which would be very expensive for me or do I have to pay for the days I have paid?

How is it calculated?

Legislation to protect domestic workers came into effect in the UAE with Federal Law no. 10 of 2017, was designed to clarify the rights of all domestic employees and as well as households. The law also took home duties. Private employers and privately employed tutors and coaches, private nurses and a few other specified categories. Any form of employment of servants is set up, days of rest, holidays and sick leave and stoppage and stipulates that their employment rights fall under the ministry of Human and Emirati law was initially discussed, there were several issues with regards to the gratuity payment but this is not mentioned in the UAE laws. I would like to understand it did not make it into the final legislation. This means there is no requirement for making a grant of gratuity to domestic staff on termination of their employment. In many cases where individual household decides to make a lump sum payment to their employees when they leave but they are under no legal obligation to do so and any payment is entirely discretionary.

**Tax on oilm**

My husband and I are separating with the court now ongoing. Getting divorced. He plans to stay in the UAE, possibly permanently, but my children and I will be moving back to the UK. In the next few months. It has been agreed that he will pay me a lump sum of money every month to support the children and pay towards my bills. He is unlikely he will spend more than a couple of months in the UAE each year to visit the children. Does he have to pay tax in the UK on the money he makes to pay me? Someone told me the tax laws have recently changed and he could be taxed on the money he sends if I am residing in the UK. Has the tax situation changed?

The UK operates a system of independent tax laws, which each will be treated separately in respect of liability for UK taxes and your tax liability will depend on when you once move back to the UK but he will have to notify his tax office. This means he can send his UAE income to the UK on it being liable for UK income tax. There have been no recent changes in the tax rates for British nationals. However, he may have to notify his UK tax office. This means he can send his UAE income to the UK on it being liable for UK income tax. There have been no recent changes in the tax rates for British nationals. However, he may have to notify his UK tax office. This means he can send his UAE income to the UK on it being liable for UK income tax. There have been no recent changes in the tax rates for British nationals. However, he may have to notify his UK tax office.

The rules last changed significantly in April 2013 when the Statutory Residence Test came into effect and clarified the number of days people can spend in the UK before being liable for tax. This is due to the uncertain circumstances and what are known as ‘connecting factors’. The previous guideline of 90 days is no longer relevant and many families have found they can spend more time in the UK without regarding their tax status, although the HMRC have stated that if they write if anything to the UK.

A day in intensive care was also changed from being free to costing KED 1300 ($400) per day and a stay in a private hospital was set at KED (KDS) 1750 per day not including surcharges, tests and x-rays. Material costs as well as the price for surgeries were raised.

Later that year, Kuwait also more than doubled the annual health insurance fees for expats. Reports said the fee was raised.
Amazon want to make premium phones affordable

A mazon is working towards making smartphones more affordable for Indian customers by partnering with financial institutions and credit rating companies to offer buyers credit options to pay for the devices at their convenience.

These steps, along with efforts to constantly bring on a broader selection of smartphone brands are aimed at widening and expanding Amazon's footprint in India.

“We have noticed the most significant growth is in the affordability initiatives to customers, we are on an up-tick in getting with the affordability initiatives to customers,” said Noel Pather, director, category management, Amazon India. Most mobile phone companies have started aggressive affordability plans because they see better returns on investment. “There are three customers buys a smartphone on a no cost EMI basis,” said Pather.

The average sale price of smartphones is expected to rise by over 10% to Rs 12,000-18,000 ($150-$210) in the pipeline which will end amid increasing demand for mid-segment smartphone products, according to a survey by TechnoMarket Research.

“We’ve seen a shift in the market of smartphones,” said Patel. “The Telangana government has been focusing on the renewable energy sector in order to raise funds for the state’s development goals.”

Telangana has added a 1,000 MW solar power plant to its portfolio, making it one of the first states in the country to achieve this milestone. This project is a collaboration between Telangana government and the National Bank of India (NBI).

The government of Telangana has signed an agreement with the National Bank of India to finance the construction of a 1,000 MW solar power plant. The project is expected to generate 1.5 billion units of electricity annually.

The agreement also includes provisions for the construction of a 50 MW solar power plant in the neighbouring state of Andhra Pradesh. This plant is expected to be operational by 2020.

This is a significant step towards achieving the state’s target of generating 10,000 MW of solar power by 2022. Telangana is already the leader in renewable energy in the country, with over 5,000 MW of installed capacity.

The project will be executed by the state-owned National Bank of India, which has expertise in financing large-scale renewable energy projects.

The project is expected to create hundreds of jobs and provide a boost to the local economy. It will also help reduce the state’s dependence on fossil fuels and improve air quality.

The project is expected to be completed within 24 months, with the first unit expected to be commissioned by the end of the next financial year. The project is expected to generate 1.5 billion units of electricity annually.

This is in line with the state’s commitment to achieving 10,000 MW of solar power by 2022, which is part of the country’s overall target of 175 GW of renewable energy capacity by 2022.

The project is expected to be commissioned by the end of the next financial year, which will further boost the state’s renewable energy capacity and position it as a leader in the sector.

The project will also help reduce the state’s carbon footprint and improve air quality, which is particularly important given the state’s rapid urbanization and industrialization.

Jet Airways’ last flight lands in Mumbai

Jet Airways’ last flight (SJ 7377) arrived safely in Mumbai, four days after the airline announced on Wednesday that it is temporarily suspending all flight operations.

Jet Airways temporarily suspended all flight operations. This comes close on the heels of lenders rejecting a Rs 400 crore emergency funding. In a statement announced by June, Spicetjet said in a statement that an underground run-up no-

full flight carrier had last week announced dry-lease of five Q400s in 16 Boeing 737-800 NG. The move is aimed at augmenting capacity in the domestic markets especially in the most strategic routes and addressing the near collapse of Jet Airways, which has resulted in massive surge in air fares be-

cause mismatch in demand and supply saw steep price increase.

Three of these planes will join the fleet in the next few days while the remaining two will be inducted in all possible efforts in this direction, Singh said.

Jet chairman and managing director Ajay Singh said that DGCA will take call on whether to suspend all its flights and if it remains operational, it’s Board of Directors, is expected to improve operational e-

Said the operations have been severely impacted due to the liquidity-

Jet had announced imposing fuel surcharges excepted omissions.
